

How often you feel like lying down for a few minutes, but don't want to "muss" up your bed. One of these couches will be just the thing for this short rest.

These Combination Couches are real treasure pieces of House Furniture. When you've learned the value of them you'll wonder why you didn't have one or more of them long ago. They are both a storage or clothes trunk and souch. The lid is operated by strong springs and remains up when raised. A slight lift by the strap raises the lid. A slight pressure of the hand lowers it. The top of the lid is built up with strong coil steel springs, upholistered in tufted sections with buttons, making a delightful restful couch. We make any size to order. Stock sizes, outside measure, 70 inches long, 29 inches wide, 13 inches high, on rollers. White mapie wood, upholstered in plain denim and lid lined inside; price, \$15.00. With entire inside muslin lined, price \$17.00. Heart Red Cedar, unholstered in striped denim, price \$22.00. Heart Red Cedar, with sliding inside tray, upholstered in beautiful figured repp cretonne, price \$27.00. White maple, upholstered in figured cretonne, price \$15.00 to \$18.50. Less 18 per cent, cash discount. You can order these by mail and be assured of satisfaction.

He had been given a glass of milk, but the attempt to take this bad been immediately followed by

AT BEDSIDE OF PONTIFF.

Professor Ettore Marchiafava, chief papal physician, and his assistant, Dr. Andreas Amici, will remain throughout the night at the bedside of the Pontiff. One of his sisters has been allowed to remain in the room, while the other is in an antercom. Monsignor Parolin, the Pope's nephew, is also watching over the l'ope to-night. Augelo Sarto, the Pontiff's brother, from whom he is said to have been estranged for some time, was hastily summoned to the Vatican, and will remain there throughout the night.

At 12:20 A. M. a bulletin was given out by Cardinal Merry del Val stating that the condition of the Holy Father was then more critical than earlier in the night. No definite announcement as to temperature or respiration was given out, but this

connections ceased running last eral condition is still considered fair-

the end might come before morning.
It was also learned from the Vatican that Professor Marchiafava had declared that he believed the Pope copious. The Pontiff's rould live out the night

Sudden Change for Worse.

[By Associated Press.]

Rome, April 15.—Once again there

forces of the Holy Father.

Notwithstanding the reassurances of Professor Marchiafava, a careful watch is being kept on the Vatican, and there is doubt that the "satisfactory general condition" of the Pontiff, as reported by the doctors, is borne out by the facts.

The temperature of the Pope, which throughout almost the whole day remained at 97 degrees, in itself indicating depression and weaknessrose in the early evening to 100, and to deal with later to 102. The bronchial symptoms, which at the morning examina-tion were found to be diminished, presented new and grave features this evening. The affected zone on the left side of the chest was further congested, with a possible area of con-solidation—one of the signs of pneu-monia—and the sounds within the bronchial tubes were more pronounc-

The attending physicians ordered a special bacteriological examination of the sputum, to ascertain whether it contained infectious material, and the nature of the detritus that threatens to block up the lungs.

Dark Reports in Circulation.

The darkest reports are being circulated, one being that the Pope is at the point of death and that Father Agostine Pifferi, an Augustinian monk, has been ordered to be in readiness to bring to the patient the last commu-nion, this being the prerogative of his

This appears to be an exaggeration of the situation, although undoubtedly the Pope's condition is much worse, as he did not take sufficient rest to-day and over-exerted himself, as he had done on previous occasions. This resulted in general prostration, elevation of the temperature and inability to retain nourishment, even the very lightest nutriment.

est nutriment.

The arrival in Rome to-night of Angelo Sarto, the Pope's brother, was interpreted in some quarters as a certain sign that all hope had been abandoned. As a matter of fact, however, Angelo Sarto left his own village on his journey to the Holy City long before the present setheck of the patient. fore the present setback of the patient

Prof. Marchiafava's visit to the sick room to-night lasted forty minutes. When he left the Vatican he was besleged for details, as the aggravation of the Pope's condition was already known, but he renewed his assurances that the situation was not grave.

The Spanish unbassador to-day vis

The Spanish ambassador to-day visited Cardinal Merry del Val, the papal Secretary of State, and inquired regarding the progress of the Pope in the name of King Alfonso. At the same time he said he had been delegated to express the feelings of the Spanish royal family for the kind

True, Nature provides these elements in a variety of edible things. We submit the following facts for those who care to know something definite on he subject: Analysis of brain by an unquestionable authority, Geoghegan, shows of Mineral Salts, Phosphoric Acid and Potash combined (Phosphate of Potash) 2.91 per cent

of the total, 5.33 of all mineral Salts. This is over one-half. Beaunis, another authority, shows

"Phosphoric Acid combined" and Potash 73.44 per cent from a total of 101.07.

Can't Get Away From It Analysis of Grape-Nuts shows Potassium and Phospherous (which join and make Phosphate of Potash) is considerable more than one-half of all the mineral

salts in the food. Dr. Geo. W. Carey, an authority on the constituent elements of the body, says: "The gray matter of the brain is controlled entirely by the inorganic cellsalt, Potassium Phosphate (Phosphate of Potash). This salt unites with albumen, and by the addition of oxygen creates nerve fluid, or the gray matter of the brain. Of course, there is a tract of other salts and other organic matter in nerve fluid, but Potassium Phosphate is the chief factor and has the power within itself to attract, by its own law of affinity,

all things needed to manufacture the elixir of life." Further on he says: "The beginning and end of the matter is to supply the lacking principle, and in molecular form, exactly as Nature furnishes it in vegetables, fruits and grain. To supply deficiencies—this is the only law of cure."

The natural conclusion is that if Phosphate of Potash is the needed mineral element in brain and you use food which does not contain it, you have brain fag because its daily loss is not supplied.

On the contrary, if you eat food known

to be rich in this element, you place be-

fore the life forces that which nature demands for brain-building. Mind does not work well on a brain that is broken down by lack of nourish-

necessary to good digestion. Worry, anxiety, fear, hate, etc., etc., directly interfere with or stop the flow of Ptyalin, the digestive juice of the mouth, and also interfere with the flow of the digestive juices of stomach and pancreas.

Therefore, the mental state of the individual has much to do (more than sus-

A peaceful and evenly poised mind is

pected) with digestion. Brain is made of Phosphate of Potash

albumen and water.

cent of the brain is composed of water and albumen, but the little worker Phosphate of Potash must be present in order to blend the more bulky materials into

compared with the greater bulk of other food elements contained in Grape-Nuts. We should also remember that this small ingredient should not be put into the food in the form it might come from a chemist, because man cannot produce

Grape-Nuts is made. A healthy brain is important, if one

believe links us to the Infinite. Mind asks for a healthy brain upon which to act, and Nature has defined a

of food which supplies the things required. Brain rebuilding material is certainly found in a very natural and perfect form in
